

Civil Engineering at WSU Tri-Cities Because the world needs **big** ideas.

Civil Engineering is a profession that uses our nation's resources to improve the quality of life for everyone, while preserving and protecting the natural environment. Civil engineers design and maintain crucial infrastructure, including water facilities, electric energy generation, solid and hazardous waste disposal, community planning, highways, railroads, airports, buildings, and bridges.

The Washington State University Department of Civil and Environmental Engineering (CEE) offers courses on the Pullman campus leading to bachelor's, master's and doctoral degrees. The Bachelor of Science degree in Civil Engineering is accredited by the national Accreditation Board for Engineering and Technology (ABET). For more details, visit www.ce.wsu.edu.

The WSU Civil Engineering program has been extended to our community, with the availability of freshman, sophomore and junior level courses at WSU Tri-Cities.

Study Civil Engineering at WSU Tri-Cities

- Small classes
- Personalized instruction
- Part of the WSU Pullman based Civil Engineering program
- Acceptance into the accredited Civil Engineering program, administered through the Pullman campus, can be obtained at WSU Tri-Cities to streamline the senior year transfer process.
